

TESTING AND THERAPY IN ONLY 20 MIN! ...AND HOW LONG DO YOU NEED?

Automated analysis and individual balancing with only one system – **Copen Scope / Mars III**

NO complicated, lengthy, tiring testing for patient and therapist

NO complicated application of electrodes

NO cumbersome, manual result evaluation but a comprehensive reporting module for creating and changing result reports

NO „mind over matter“ but „Mind matters“

NO 08-15 standard programmes - your patients are as individual as you are

NO limits - you can expand the Copen MARS III database yourself as you wish

More and more patients come to the practice with unclear symptoms. They complain of chronic pain or symptoms that cannot be clearly assigned to a disease. If there is no classification, the symptoms are often dismissed as „psychosomatic“ or the patient has to learn to live with his or her complaints.

For 70 years, Bruce Copen Laboratories has been developing efficient and easy-to-use systems for **holistic information medicine balancing**. We have always focused on the cause of a disease - not the symptom. Our concern is the **holistic therapy of body, mind and soul**.

As a naturopathic therapist you know about the complex relationships in our organism. **The Copen Scope / Mars III system** supports you in finding out which factors lead to an illness in your patient and provides you with **automated, fast and reliable results**. Based on these analysis results, you create **individual balancing programmes** for the patient and apply them via globules, hand applicators or magnetic memory cards, among other things; and this is completely painless and non-invasive for the patient.

Copen ScopeQ / Mars III – Fast, comprehensive and expandable in application.
